

We believe that after you have driven with the brake guard on your vehicle you will agree it was one of the best investments you ever made, and that to drive without it would be unthinkable.

After driving with this system, please take a few moments to send us your comments on the attached form. In Your Own Words! We would like your comments on the differences that you notice.

We Sincerely Thank You

To Whom It May Concern,

On October 18 , 20 13 . We had Brake Guard HD-400, -500 system installed on our 1995 Fleetwood Flair/2004 Rubicon Jeep Towed Motor Home / Tow Vehicle.

COMMENTS I retired as a mechanic for an underground company working heavy equipment 7 years ago. This is my third motorhome and it had very poor brakes. I was looking for a disc brake rear end when I found Brake Guard on the internet. I watched all of the videos and was still very skeptical. But I gave Lawrence a call and we made arrangements to put Brake Guard on my motorhome. Then we took it for a test drive.

I was BLOWN AWAY at how much it improved the brakes! I cannot say enough good about Brake Guard and Lawrence. I have recommended this to at least two of my friends, and I would recommend to you as well!

In closing I would suggest that you give Lawrence a call if you have poor brakes on your motorhome.

Date October 26, 2013 Robert Waldrip

Signed Robert Waldrip

Address 13045 Shenandoah Drive

City/State/Zip Lakeside, CA 92040
